Science and Digitalization for a Better Future

Virtual event

In the pursuit of a more technologically advanced and socially responsible future, the Think 7 (T7), an engagement group of G7, has established a dedicated task force called "Science and Digitalization for a Better Future" (TF4).

The task force underscores the pivotal role that science, technology, and digitalization play in shaping the future. TF4 is designed to address pressing issues at the confluence of these domains, with a specific emphasis on fostering a more technologically advanced and socially responsible global landscape.

The event will discuss how to foster innovation and cooperation among G7 nations and explore cooperative ways to advance the development of digital governance in an ethical, sustainable and inclusive way. In addition, it will explore ways to harmonise digital regulations to promote a consistent and globally cooperative approach.

12:30-12:35 Opening remarks

Federica Marconi

Istituto Affari Internazionali

12:35-13:30 Expert Panel

Alek Tarkowski
